

Todd Klinger

Carlisle, PA | toddjek@icloud.com | toddthegod1.github.io | github.com/Toddthegod1

Education

Dickinson College

B.S. Computer Science and Data Analytics, Minor in Mathematics | GPA: 3.8

Carlisle, PA

Expected May 2027

Relevant Coursework: Statistical & Machine Learning; Probability & Statistics II*; Analysis of Algorithms*; Linear Algebra; Data Structures; Data Systems; Software Development; Cloud Computing; Computer Networks; Cryptography; Information Assurance (*in progress)

Technical Skills

Languages: Python, Java, JavaScript/TypeScript, SQL, R
Machine Learning: TensorFlow, PyTorch
Data & Analytics: Pandas, NumPy, Matplotlib, Power BI, Qualtrics
Cloud & DevOps: AWS (EC2, RDS, S3), Docker, Vagrant, Nginx, Unicorn, Git
Web & Testing: Flask, Next.js, React, Prisma, OpenAPI/Swagger, Selenium, Playwright, Cypress

Experience

US Army War College

Data Analytics Intern – Office of Institutional Assessment & PKSOI

Carlisle, PA

Jan 2026 – Present

- Built AI-assisted Python pipelines that transform Qualtrics survey exports into automated post-course, alumni, and faculty/staff climate reports, cutting average report-building time from ~12 hours to ~8 minutes.
- Analyzed wargame datasets from 40+ simulations to identify troop movement and engagement patterns, building turn-by-turn visualizations of battlefield dynamics.
- Designed multi-year trend indicators and standardized report templates to communicate student achievement results to senior leadership.
- Built and deployed an interactive HTML/JavaScript dashboard consolidating alumni roster and survey data, with network-graph and career-outcome visualizations for the PKSOI internship program.

NIH (National Institutes of Health)

API / OpenAPI Developer

Bethesda, MD

May 2025 – Jul 2025

- Designed OpenAPI specifications and schemas for biomedical imaging APIs, improving endpoint structure and documentation for external researchers and developers.

Projects

Zulip – Open-Source Contribution (Senior Seminar Team)

2026 – Present

Python, Django, Git

- Contributing to Zulip, a large open-source team chat platform, with a four-person team; set up the development environment and working toward merged contributions through the project's issue and code review process.

Ho Chi Minh City Housing Market Analysis – ML Course Project (Team of 3)

2026

Python, Pandas, scikit-learn, XGBoost

- Analyzed 2017–2022 housing prices across nine districts, merging CPI, population, and spatial data to show inflation-adjusted growth diverged sharply from nominal (19–21% real vs. 38–40% nominal in two districts).
- Built 1-, 7-, and 30-day XGBoost forecasts benchmarked against a naive baseline, and segmented districts with k-means and PCA to isolate a low-price, high-growth outlier.

Voteometer – Probabilistic Decision Support Web App

2026

Next.js, TypeScript, React, Prisma, Vercel

- Built and deployed a full-stack app that ranks candidates by combining user preference weights with a probabilistic model of head-to-head electability. Live Demo | GitHub

Benny – AI Campus Assistant Chatbot (Devil Labs)

2026

Python, Web Scraping, NLP

- Co-built an NLP-powered chatbot answering Dickinson-specific student questions, designing scraping pipelines to structure campus data; won Dickinson's Innovation Competition.

Leadership & Activities

Treasurer, Math/CS Club; Programming Club

2024 – Present

Competitive Table Tennis Player; Assistant Coach

2015 – Present

Volleyball, Badminton, Tennis Clubs | Study Abroad (New Zealand)

Ongoing | 2025
